To: Carter Ward — Executive Chef
Subj: Requesting to help me in convincing Omar and Deanna

Hello Carter,
Hope you are doing well. I'm Peta, the project manager of Menu Tablets. I want to talk to you about convincing Omar and Deanna.

We discussed Omar's idea of expanding the project to all sections in the restaurants instead of only bars. We saw a huge amount of risks there that can go wrong, and the expansion will cause a huge budget so the risk is not worth taking. There will be issues with management too. So, we discussed and agreed on sticking with the original plan, monitoring the metrics and expanding accordingly, step by step.

Seydou, the Restaurant Consultant is also agreed and Larissa who has vast experience in this industry, also agreed to stick with the original plan. So, we have to convince Omar and Deanna about the facts we discussed and agreed and make them agree with us. I want you to help me in this matter, as I know, you care about the restaurant and are working hard to bring your vision for Sauce & Spoon's scratch-to-table cuisine and sustainable sourcing to life.

I hope you will join the conversation.

Thanks,
Peta

Subj: Requesting to help me in convincing Omar and Deanna

Hello Seydo,
Hope you are doing well. I'm Peta, the project manager of Menu Tablets. I want to talk to you about convincing Omar and Deanna.

We discussed Omar's idea of expanding the project to all sections in the restaurants instead of only bars. We saw a huge amount of risks there that can go wrong, and the expansion will cause a huge budget so the risk is not worth taking. There will be issues with management too. So, we discussed and agreed on sticking with the original plan, monitoring the metrics and expanding accordingly, step by step.

Executive Chef Carter is also agreed and Larissa who has vast experience in this industry, also agreed to stick with the original plan. So, we have to convince Omar and Deanna about

the facts we discussed and agreed and make them agree with us. I want you to help me in this matter, as I know, you care about the restaurant and agreed to help us in the project to implement cost-effective, integrated and easy-to-use restaurant technology systems.
I hope you will join the conversation.

Thanks,
Peta
